

CLASS 1* PERMIT MODIFICATION NOTICE
HAZARDOUS WASTE MANAGEMENT FACILITIES
LAWRENCE LIVERMORE NATIONAL LABORATORY – LIVERMORE SITE
EPA ID. No. CA 2890012584

On January 9, 2001, Lawrence Livermore National Laboratory (LLNL) notified the Department of Toxic Substances Control (DTSC) of its intent to modify the hazardous waste facility permit. The permit modification request included a Class 1* modification, which was approved on July 19, 2001. The Class 1* modification was a revision to the Part B Permit, Volume 4, Waste Analysis Plan (WAP), Table 5. WAP Table 5 was revised to allow the use of spectrophotometer instrumental methods for metal fingerprint analysis and instrumental conductivity methods for PCB fingerprint analysis.

Pursuant to 22 CCR § 66270.42 and 22 CCR § 66270.42 Appendix I, this hazardous waste permit and operation plan modification meets the definition of a Class 1 permit modification requiring prior written approval from DTSC before implementation. Class 1 permit modifications apply to minor changes that keep the permit current with routine changes to the facility or its operation. These changes do not substantially alter the permit conditions or reduce the capacity of the facility to protect human health or the environment.

Questions regarding the Class 1 permit modification may be addressed to the following DTSC or LLNL representatives:

Mr. Michael Stanek
Department of Toxic Substances Control
8800 Cal Center Dr.,
